

Please oppose HR 4026. If you take this away from us, I believe the economy will slowly start to decline. The faster we get to where we need to go, like shopping etc, the more likely we are to spend more. Without accurate reports, we can't stop at a store before being at work, because we will be late, or we won't stop at an extra store because we will not have time. Do we really want the economy to decline even further?????????????????
